

## LED SOLAR TORCH LIGHT LIGHT CONTROL

Please read the user guide before use and keep it properly

- ①Solar panel
- ②Led lamp heads
- ③ABS
- ④Plastic ground spike
- ⑤ON/OFF
- ⑥Longer ground stake

## ELECTRICAL CHARACTERISTICS

- 1.Solar panel: 0.88w, 17% efficiency
- 2.Li-ion battery: 2200mAh
- 3.Weigh: 230g
- 4.Size: 320\*121\*121mm
- 5.LED: 3528\*96PCS
- 6.Lumens: 35lm
- 7.LED span life: 50,000Hrs
- 8.Solar charging time: 8Hrs
- 9.Auto identify day or night
- 10.Protect function: Over charging, over Discharging, over cur rent, short circuit
- 11.Li-ion battery span life: 500 circles
- 12.Solar panel span life: more than 5 years

## HOW THE COLAR POWERED LIGHT WORKS

During the say, the solar panel of the top converts Sunlight into electricity and recharges the battery.

On the solar panel there is a photosensitive control switch. At night the light can automatically turn on using the electricity stored (you also can cover the solar panel with you hand to enter night mode).

After daybreak the light will automatically turn off the lights and enter charging mode.

## PRODUCT DESCRIPTION

Solar energy light is a new product to use solar power for producing electricity. This light uses high-efficiency solar panels, which can transform solar energy to electric energy and stock it into storage battery. Then it can provide energy to LED light for shining.

The unique optical controlled technology can ensure the light auto charging in daytime. Then, the light can automatically lighten in the night. In addition, the light is easy to install, waterproof and anti-sunburn.

## ADDITIONAL NOTE

- 1.The lamp should be charged for 5 hours under the sunlight before using
- 2.If There is good sunlight in 3 months, the battery may be out of power. So you have to charge it with bright sunlight. When it's fully charged, it can function normally.
- 3.If the light blinks, it shows that the power is low. Thus, you have to charge it with the sunlight right away. Otherwise, the device will stop functioning soon.
4. If there is no strong sunlight or during the winter season, especially at the north countries, it may take longer time to fully charge the device and this is a normal situation for solar products.

## WARNING

- 1.Keep the device away from fire, water and avert the product immersed in water in order to avoid explosion, leakage.
- 2.The device does not have any charger.
- 3.No one except professional technicians should attempt to disassemble the device in order to avoid damaging the product.

## PACKAGE INCLUDE

- 1\*LED Solar Torch Light
- 1\*User manual
- 1\*Plastic ground spike
- 1\*Longer ground stake
